

Mt. Gunnarupt Volcanic Hazards Map

Notes:

1. Pyroclastic flow deposits range from 3-6 m in thickness
2. Ash fall deposits range in thickness from 0.25-0.50 m
3. Lahar flows travel at velocities of 5-10 m/sec depending on the slope
4. Lahar deposits range from 0.5 m thick on steep slopes to 5 m thick on shallow slopes
5. Lava flows are found in the near vicinity of the summit
